**Subject:** Reject the proposed plan to fill in the quarry

**[CAUTION: External Email]**

Dear Pacifica City Council,

I am writing to express my strong opposition to the proposed plan to fill in the Pacifica quarry with 874,000 cubic yards of waste soil. I believe that this plan would have a number of negative consequences for our community.

First, the impact to traffic would be significant. The plan would require 146 truck trips per day for four years. This would cause major congestion on our roads and make it difficult for residents to get around.

Second, the waste soil could contaminate the area. The soil may contain harmful chemicals that could leach into the groundwater and pollute our drinking water. It could also contain asbestos, which is a known carcinogen.

Third, the people of Pacifica don't want the quarry to be changed. The quarry is enjoyed by residents and visitors alike just as it is.

I urge you to reject the proposed plan to fill in the Pacifica quarry. It is simply not worth the risk and expense to change anything about it.

Sincerely,  
Justin Shields
