From: Audrey Koenig, [REDACTED], Pacifica, CA 94044

I am writing in support of the Cal Coast for Responsible Tech, and against the installation of 4G/5G Small Cells, more accurately called Close Proximity Microwave Radiation Antennas (CPMRAs) in Pacifica.  
By allowing these two antennas you are setting precedent for the city to have these CPRMAs every 1000 ft all over our city streets.

Cal Coast has given you the resources to legally deny these applications.

We ask that Council-member O'Neill honor his comment to update the city's wireless ordinances, and to make this a priority. You have community support in this endeavor.

Lastly, many of us feel our comments about the health hazards and dangers of these installations are not being heard. This is very disconcerting and alienating to your constituents. A simple solution is to pass a resolution, joining the growing number of cities nationwide, stating your opposition to the forced CPMRA rollout that is facing our city and nation, and in support of US House bill HR530 and Senate bill S2012 which are aimed at restoring local authority in broadband development.

Sincerely,  
Audrey Koenig

**[CAUTION: External Email]**

Dear council members,

I am writing in support of the appeal of the Verizon cellular tower proposed to be installed at 1307 Redwood way. I live at [REDACTED]. This tower will be 17 FEET from my son's nursery and my daughters window. I encourage you to come visit my home and the proposed site. After seeing in person, I don't believe you would support a tower erecting in front of your home or a loved one's home. Furthermore, based on the versions provided evidence that the council based their appeal decision on last month, you are setting precedent for these antennas to be every 1000 ft on our streets. Do you really want our Pacifica streets to be lined with these cellular towers every 1000 feet? Please reconsider this and support the wellbeing of your Pacifica residents.

Also, Councilmemeber Oneill agreed that we should update our ordinances that needs to be a priority. Please support US House Bill HR530 and Senate Bill S2012 that aimed at restoring local control over regulation of WCF installations.

Sincerely,  
Lena Koenig
